statustime [<seconds>] sets or returns status timeout show if CICS has an call in/out link</seconds>	alesearch	tests if there are any ALE networks
link show if CICS has an call in/out link	mute [off voice selcall]	reflects mode of speaker mute
1. 2. 2. 2. 2. 2. 2. 2. 2. 2. 2. 2. 2. 2.	statustime [<seconds>]</seconds>	sets or returns status timeout
hangup closes connection link	link	show if CICS has an call in/out link
	hangup	closes connection link

CICS call commands:

selcall	<dest></dest>	initiates selective call
telcall	<dest> <num></num></dest>	initiates tel-call
pagecall	<dest> <msg></msg></dest>	sends msg and waits for ack
gpsbeacon	<dest></dest>	request for the gps position
gpsposition	<dest></dest>	sends gps position
stuncall	<dest> <pin></pin></dest>	decommissions remote tcvr

statuscall	<dest> <msg></msg></dest>	status request call
statusack	<dest> <msg></msg></dest>	acknowledgement of the status request
selbeacon	<dest></dest>	selcall beacon call
alebeacon	<dest></dest>	ALE beacon call
beacon	<dest></dest>	beacon call
alecall	<dest>[<msg>]</msg></dest>	establish ALE communications link
aletelcall	<dest> <num></num></dest>	establish ALE tel-call link
call	<dest>[<msg>]</msg></dest>	initiates voice call. Optional msg with ALE
amd <msg></msg>		send AMD messsage on existing ALE link
sound [on o	ff now]	enable, disable or initiate sounding
<dest> = <dest address="">[@<network>]</network></dest></dest>		
<self> = <self address="">[@<network>]</network></self></self>		
<msg></msg>	= <message sent=""></message>	First argument after <dest> not an option</dest>

CICS call options: (any order after <dest>)

thischan	Limits ALE call to current channel
+/-lbt	Force/skip listen before transmit
+/-lqa	Force/skip link quality exchange on ALE
from <self></self>	Specify selfid and optional network
tis [<self>]</self>	Like "from" but only use with ALE
twas [<self>]</self>	Like "tis". Forces link to close
s	mute the Speaker during call
